

Helium-3 (³He)

Helium-3 is a light, non-radioactive isotope of ordinary helium whose natural abundance on earth is 1.38×10^{-6} . It is odorless, colorless and tasteless, and it is principally shipped and used in gaseous form for neutron detectors, nuclear magnetic resonance (NMR) tracers, spectroscopy, low-temperature physics, lasers, dilution refrigerators and nuclear fusion research.

PRODUCT DETAILS/PURITY SPECIFICATIONS

Parameters	Reference Specifications
Helium-3, atomic fraction (%)	≥ 99.8
Helium-4, atomic fraction (%)	≤ 0.2
Total Helium (He-3 and He-4), volume fraction (%)	≥ 99.995
Nitrogen, volume fraction (%)	$\leq 6 \times 10^{-4}$
Hydrocarbons, volume fraction (%)	$\leq 6 \times 10^{-4}$
Hydrogen, volume fraction (%)	$\leq 6 \times 10^{-4}$
Oxygen and Argon in total, volume fraction (%)	$\leq 6 \times 10^{-4}$
Carbon Oxide, volume fraction (%)	$\leq 6 \times 10^{-4}$
Volumetric activity of Tritium, Bq/L (Ci/L)	$\leq 4.8(1.3 \times 10^{-10})$
Tritium, atomic fraction (%)	$\leq 1 \times 10^{-11}$
Carbon Dioxide, volume fraction (%)	Not specified
